

Notes from interview with advisor:

March 15, 2021

- Believes that the format of the search function and student mode should be redesigned.
- Should be able to see all the problems at once.
- Ease in identifying and finding a problem that one would want.
- Likes the idea of the hashing and the login system.
- Does not like the idea of having duplicate usernames.

March 25, 2021

- Likes the direction of the program.
- Wishes that the program may be more visually appealing.
- Raises the possibility of mathematical formatting.
- Thinks that the relatively robust nature of the program is good.
